

Christine Booth

After having been a Member of My Time at the Grovely ECDU, where it brought many parents closer together, and provided us with many opportunities to socialise and network, I was quite worried what would happen once my son started at special school.

Luckily for me, The My Time Extension Group at Mitchelton State Special School was established. Not only have I been able to continue to build existing friendships with other parents who I already knew, but I have also been very fortunate to meet other parents from the school outside of my son's class.

Through guest speakers, I am learning about services available to our family. My Time also gives me some quality time for me when the activity is a "treat".

At many of The Extension My Time Group get-togethers, our principal, Wayne is in attendance, and this has been a brilliant opportunity for parents to get to know Wayne better and learn more about what's happening at the school face-to-face. He's learning a lot about us too!

"I feel extremely fortunate to have a very successful My Time Extension Group at Mitchelton State Special School and never miss an opportunity to spread the word to other parents who may not realise what a fantastic group it is."
